

Opioid Epidemic Outreach Presentation

August 7th 2018

Layton City Amphitheater

6:00pm to 9:00pm

The purpose of this event is to provide hope to the hearts of those in attendance that good things can come to pass even after addiction by providing education, resources, and personal stories of triumph.

It is imperative that our community come together to unify in this cause of bringing light to a dark and secret subject that is destroying our families and lives. Our children are being introduced to drugs at younger and younger ages. We truly need to take a collective stand and reclaim our community from the grasp of this addiction epidemic that is infiltrating our very society.

This outreach presentation is a collective effort by those who have been and will continue to bring light, hope, and resources into our community. Those attending will have the opportunity to hear from key players in our community on this very important subject. It will truly be a historic event.
