

Layton City Emergency Management would like your help with the EARTHQUAKE RECOVERY IN UTAH

MARCH 2020 MAGNA EARTHQUAKE

As we begin the recovery efforts of the 5.7 earthquake that occurred on March 18, we would highly recommend community members to do a visual assessment of their home or business. Utah has 30 days from the date of the earthquake to submit a Presidential Disaster Declaration and request FEMA's Public Assistance (PA) and Individual Assistance (IA) programs. It is important that damage assessments are provided to DEM as soon as possible within that timeframe.

STEPS TO TAKE

- Look for cracks in the foundation.
- Look for damage to exterior or interior walls, including cracks, ceiling and floor issues, lighting damage, windows and doors that do not open properly and roof damage.
- Take photos to document the damage.

For more information on preparing for an earthquake in the future, go to the link below.
