

Project Area Map

1425 North Parking Changes

Beginning **Monday, May 14**, there will be **no street parking** permitted on 1425 North between Woodland Park Drive and Hill Field Road due to roadway improvements. Crews will be upgrading 1425 North to a three-lane road with a center median and narrow shoulders. Any cars parked on the street or at Layton Hills Mall will be towed at the owners' expense. Crews will also begin resurfacing the roadway at this time, be aware of traffic shifts and follow construction signs.

Project Overview

UDOT and Layton City are nearing completion of the Layton Crossing project. The improvements include a new east-west connection across I-15 between SR-126 (Main Street) and Hill Field Road. The bridge over I-15 runs from the east side at 1425 North to the west side between Kohl's and the Cutrubus Motors body shop. This project also includes a new intersection at Main Street and realignment of Angel Street.

The project will improve east-west mobility in Layton, relieve traffic congestion at the Antelope Drive and Hill Field Road interchanges, and promote economic development in Layton's commercial area.
