## Emergency Bleeding Control Education

A person can die from blood loss within five minutes. Uncontrolled bleeding is the number one cause of preventable death from trauma. Learn how to help when someone is injured while waiting for emergency medical responders. Sign up for a **FREE 1 HOUR CLASS** to learn to identify different types of bleeding, wound-packing, compression hands-on skills training and tourniquet application.

**Thursday May 23, 2019**

2:00, 3:30, 5:00 and 6:30 p.m.
